DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 14-21, and 27-34 are drawn to a color-image forming device and method using a color-drift correction execution interval setting unit, classified in class 347, subclass 116.
- II. Claims 9, 10, 22, 23, 35, and 36 are drawn to a color-image forming device and method using a color-drift cancellation unit, classified in class 399, subclass 301.
- III. Claims 11-13, 24-26, and 37-39 are drawn to a color-image forming device and method using an image quality determination unit, classified in class 399, subclass 49.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an interval setting unit in a device without a cancellation unit or a determination unit. Invention II has separate utility such as a cancellation unit for a color-drift correction unit without an interval setting unit or in a device without a determination unit. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2852

Because these inventions are distinct for the reasons given above and the search required for any one of Groups I, II, or II is not required the remaining Groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Paul Teng on 18 May 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan Gleitz whose telephone number is (571) 272-2134. The examiner can normally be reached on Monday-Friday between 9:00AM and 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on (571) 272-2136. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
